

Gasdruckfeder

The reliable way of transporting tools on platform trucks. The light tare weight of just 33.7 kg (incl. handles) means that the box is easy to transport and can be comfortably packed and unpacked in the workshop or on the construction site. Tool transportation: clean, practical, theft-proof!

Good ideas for simple handling

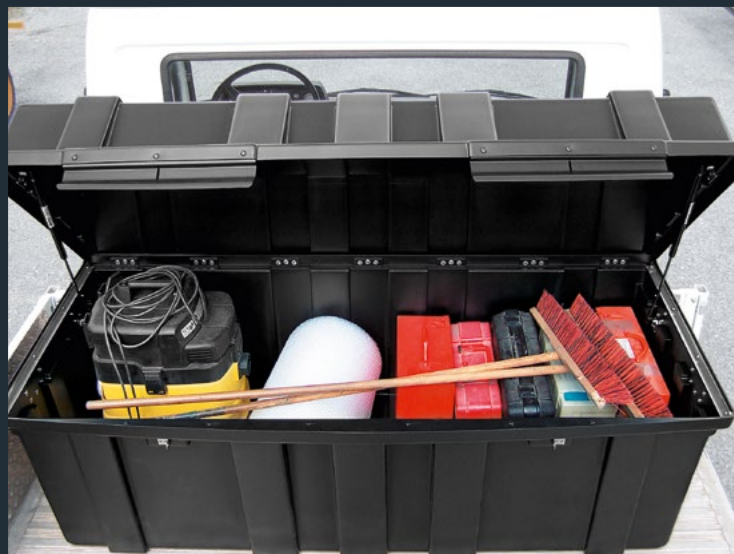

- Box can be placed close to the driver's cabin to avoid an unnecessary reduction of the cargo area. The 45° cover opening angle means that the box can be opened wide.
- Rear view is not inhibited
- Gas pressure springs hold the cover open

Available as an accessory

- Anti-skid mount on the platform
- Handles for transportation

Approved ROWEKO quality

- Light and robust construction from HD-PE
- Impact-resistant, even in extreme temperatures
- Splash-water-resistant and weatherproof
- Chemical and UV-resistant
- Hinges and rivets made from VA steel
- Safe and secure: Snap lock

Platform toolbox

Size (width x depth x height)

1.750 x 800 x 720 mm

Material

Polyethylene Plastic (HD-PE), black

Weight

32.50 kg

Execution

The lid (snap lock) is riveted to the box with 7 hinges. 2 gas pressure springs make it easy to open the lid and keep it open. For additional reinforcement, angles are riveted to the front (with cover) and sides. The hinges and rivets are made from stainless steel (V2A) and the angles are made from aluminium.

Locking system as per description on page 25

Article	Part no.	Price [€]
Snap lock		
With locking split pin	221 60 000	
With padlock (simultaneous locking)	221 60 600	

Accessories

Article	Weight [kg]	Part no.	Price [€]
Assembled handles	1.20	221 60 001	
4 pieces Max. weight of 35 kg each			
Mounting profiles	1.10	421 20 030	
- 2 x clamp plates (540 x 96 x 10 mm) HD-PE black - Screw set for box installation			

- 1** Mounting profiles
- 2** Handles

Installation instructions
for platform crate

The open platform truck is, in many ways, the ideal vehicle for industry and trade. Only one thing is missing – a secure place to store machines, tools and assembly materials. These are often simply put in the driver's cabin.

**The ROWEKO platform box brings order.
Clean – practical – theft-proof.**

No matter how individual the requirements, or how different the vehicles may be – we have the right platform box for everyone.

- Various sizes
- A range of heights (standard H = 400 mm)
- Cover is held by chains
- Rear view is not inhibited

Available as an accessory

- Mounting profiles for fixed mounting on the platform
- Stainless steel U-frame with guide rails and retractable divider (standard for width of 1350 mm)

Approved ROWEKO quality

- Light and robust construction from HD-PE
- Impact-resistant, even in extreme temperatures
- Weatherproof
- Chemical and UV-resistant
- Hinges and rivets made from stainless steel

Platform box

Size (length x width x height)

- 1350 x 400 x 400 mm
- 1000 x 400 x 400 mm
- 800 x 400 x 400 mm

Material

Polyethylene Plastic (HD-PE), black

Execution

Platform box for vertical installation only!

- Box canted and welded
- End piece welded to box
- Higher lid with VA hinges riveted on to box
- 2-point lock
 - + security lock (standard: double bit) with 2 keys, lock cover
- Lid opening restricted to around 110° by means of removable chains
- Standard height of 400 mm

Other heights available upon request

Locking system as per description on page 25

Article	Weight [kg]	Part no.	Price [€]
2-point lock			
With double bit security lock			
Width of 1,350 mm	17.20	227 20 300	
Width of 1,000 mm	10.60	226 20 300
