

Fixture for vehicle mounting made from red painted steel

The black fire extinguisher box, which is made from high quality polyethylene, offers rapid access through the proven snap lock. The cover is opened with a single hand action providing full access to the extinguisher. The extinguisher stands, vibration-proof, in a separate steel mount with two lashing straps, developed for extreme use on the street.

Model 2 with red cover and window made from polypropylene has an integrated mount with a plastic belt for fixing the extinguisher. The cover is held shut with two clip locks.

The lid can be opened on the left or right by turning it.
